

# CLASS XII SAMPLE PAPER PHYSICS

---

1. What is electrification.
2. What is neutralization.
3. How many types of polarity.
4. What are types of charge.
5. What is charged body or electrified body.
6. What is friction electricity.
7. How will you prove that charge is transferred.
8. Who suggested that there are two type of charges.
9. Who suggested about sign convention of charges.
10. What is electromagnetism.
11. Who gave theory of unification in physics.
12. What is angle of diversence, and how will you calculate rough value of charge on the body with help of it.
13. How will you make vibrating gold leaf stable in electroscope?
14. What is drawback of electroscope.
15. What is test charge.
