SECTION - A (READING)

1. Read the following passage carefully and answer the questions that follow: (5 marks)

Gorilla is the largest of the great apes. A large male gorilla living in the wild may weigh 204 kilograms. Standing up on its legs, it may be about 6 ft tall. Females usually weigh 91 kilograms and are shorter than males. Gorillas live in the rain forests of Central Africa. They are unaggressive creatures living in family groups led by a big male. Each group wanders in its own home range. During the day gorillas rarely travel much more than one kilometer because the leaves and shoots that they eat are plentiful in the forests where they live.

A gorilla's day starts at dawn at about 6 a.m. when the party wakes and searches for food. From about 10 a.m. until 2 p.m. they rest. When the adults rest, younger apes wrestle with each other, play games and swing back and forth on vines. After this, the party travels through the forest again looking for more food until dusk i.e. about 6 p.m. Gorillas are always on the move and never spend more than one night in the same place. They sleep in nests made of branches which they break or bend to make a crude platform either on the ground or in trees. Adult gorillas build their own nests while baby gorillas snuggle in with their mothers. A new nest is made everyday. Because of hunting, destruction of rainforests and human wars that affect gorilla habitat, gorillas are now very rare. There are less than 400 gorillas left in the wild.

On the basis of your understanding of the passage, answer the following questions:

- 1.1 Why do gorillas make new nests everyday? (1)
- 1.2 Why do you think Gorillas have become rare? (1)
- 1.3 What do the baby gorillas do while adults rest? (1)
- 1.4 What do gorillas do from 6 am in the morning till 2 o'clock in the afternoon? (1)
- 1.5 Pick out two words which means the same as : (1)
